

Thinking about a solar hot water system for your home?
The NH Electric Cooperative has rebate money - up to \$1500 - available for you!

There are some requirements, including that you must be in their utility territory. Currently, this rebate program is undersubscribed, and they are seeking interested members. **For more information, contact Tom Palma at palmat@nhec.com.** If you get your electricity from another utility, why not call them and ask why they don't provide a similar rebate?

But wait..there's more:

Check out these small wind system rebates 25% up to \$3,000:
http://www.smallsteps.coop/coop_programs/wind_generator.php

Thanks. Let us know how you make out with these programs.
